## The Dance of Life

This dynamic partnership is a remarkable interchange, a flow of two united in movement and purpose. One is the leader and the other reads the signals to keep moving together in a beautiful unity. It's exhilarating! Sometimes the dance moves can take your breath away!

Dancing is a beautiful image of the romance and adventure of our personal relationship with God. For any hope of success, we must accept His lead and then practice to be able to read His cues and signals. If we try to create our own steps apart from His, the results will be awkward at best, tragic at worst. Meanwhile as we slowly learn, toes will get stepped on and the timing may often be a bit off. But as we gradually come to know Him well,  
we become more able follow His masterful lead with complete abandon.  
And when THAT happens... well... it goes beyond exhilarating.

"No eye has seen, no ear has heard, no mind has conceived what God has prepared for those who love Him." 1 Cor. 2:9
